

Wanted!

Environmental pollution and deforestation is everywhere! In order to combat against this, you must make the public aware of how these pollutions affect our area...so you will make a WANTED POSTER to describe the pollution, what causes it, and how to stop it. The choices for your poster are...

Acid rain

Air Pollution

Deforestation

Greenhouse effect - Global Warming *(Extension choice)

Each poster should have the following parts listed below...

1. Photos or images and diagrams that represent your topic.
2. Description - what is your environmental pollution so that anyone can recognize it (i.e. what does it look like in the environment, danger signs, etc.)
3. How is the pollution / problem created (source) and what is the negative effect on the environment?
4. The culprit's hideout - Any regions where the pollution is highly evident.
5. Is it armed and dangerous? - How dangerous is the environmental pollution to human health?
6. What is the most effective weapon against the pollution / problem - what are some possible solutions to the pollution problem?

You will have the next 5 lessons to plan and create your poster. I will provide you with the poster paper, colored pencils, markers, etc. You may use materials from home if you wish. You may utilize computers to do any research and/or find images you need for the project. You may also use your notes and other class activities. If you do research on the Internet, the Internet addresses must also be provided along with the poster.

**Hint = it will be helpful to do research at home in order to come to class prepared to finish the poster by the due date. The rubric for the project is located on the back of this page...*

Poster due date: Thursday, 17 November
